

E_XTS_TRANSPORT_CTRL.CMD_TRANSPORT_RESTART:
1. handshake stations with incomplete outfeed (stuck in RELEASE, tell them the mover is GONE)
2. Prepare Movers to _MoverLastPosition[]
3. Start with Mover 1
3. Check if Mover is enabled
4. Check for DONE from sending method
5. iterate thourgh all movers
6. If all movers are triggered to move, you should check for
_GroupInfo.AllAxisStatndstill befor moving any tooling onto the movers
